

SHAHED PERVEZ NOKIB

Data Analyst | AI / Machine Learning | Automation

Dhaka, Bangladesh | 01914284444 | shahedparvez101@gmail.com

linkedin.com/in/nokib101 | github.com/nokib-101

PROFESSIONAL SUMMARY

Data Analyst and CSE graduate from BRAC University with a strong foundation in machine learning, computer vision, and data-driven automation. Experienced in building predictive fare-estimation models (XGBoost, LightGBM) for a ride-hailing platform, automating business workflows with n8n and Python, and delivering real-time operational dashboards in Metabase. Background includes applied machine vision research including a TinyML-based real-time person identification thesis with a consistent focus on turning technical analysis into measurable business impact.

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL, Java

Machine Learning & Data Science: XGBoost, LightGBM, Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy

Computer Vision: OpenCV, MobileNetV2, MobileFaceNet, TinyML (Edge Deployment), YOLOV8

Data Analytics & BI: Microsoft Excel, Metabase, Looker Studio, Google Analytics 4 (GA4), Mixpanel, Microsoft Clarity

Databases: PostgreSQL, MySQL

Automation & Tools: n8n, Apps Script, Git, Figma

Web Development: Django, FastAPI, HTML, CSS, Bootstrap

PROFESSIONAL EXPERIENCE

Junior Data Analyst - Garibook *Jul 2026 – Present*

- Automated business processes using n8n, SQL, and Python.
- Built predictive fare-estimation models for a ride-hailing platform using XGBoost and LightGBM.
- Developed Metabase dashboards providing real-time operational insights.

Junior Software Analyst - Antopolis *Nov 2025 – Feb 2026*

- Supported software development by analyzing requirements, workflows, and system behavior.
- Assisted in data analysis, API validation, and issue resolution.
- Collaborated with cross-functional teams on implementation, testing, and documentation.

PROJECTS

Fare Prediction & Bid Recommendation System

- Built a FastAPI machine learning application serving trip-type-specific predictive models for driver fare recommendations.
- Integrated OpenStreetMap and OSRM APIs to calculate pickup/drop-off road distances, with offline fallback handling.
- Implemented model routing, prediction intervals, and unseen-category detection for robust production inference.

Real Estate Web Application

- Developed an e-commerce web application for buying and selling properties using Django, PostgreSQL, HTML/CSS, and Bootstrap.
- Implemented Git version control and SMTP (Gmail) integration for transactional notifications.

GitHub: <https://github.com/nokib-101/Real-Estate-Project>

EDUCATION

B.Sc. in Computer Science & Engineering - BRAC University 2024

Higher Secondary Certificate (Science) - Dhaka City College 2019

LEADERSHIP

Head of Machine Vision - BRACU Duburi 2023 – 2024

- Designed and implemented machine vision algorithms for underwater object detection, tracking, and classification.
- Developed and executed testing protocols to validate vision system performance in underwater conditions.

President - BRAC University Adventure Club 2023 – 2024

- Provided strategic leadership and direction for the club.
- Oversaw the planning and execution of club activities.

Secretary of Finance - Robotics Club of BRAC University 2023 – 2024

- Managed sponsorships and budget planning.
- Conducted workshops on robotics.

ACHIEVEMENTS

- First Runner-up, Physics Olympiad, organized by the WRE Department of BUET.
- Vice Chancellor's List: 1 time.
- Dean's List: 2 times.

LANGUAGES

Bangla - Native | English - Proficient | Hindi - Conversant
